

Intro to Python

Camp Overview

During this week, your child will learn the fundamentals of Python Programming, basic game development, and how to create one of the industry's most famous games of all time. This form is also available online at sdcoding.org/pythonoverview

Lab Donation

San Diego Code is a nonprofit organization, however everything we create and give back to the community takes hundreds of hours to create. For this reason we request each child for a lab donation of \$25. This money is used primarily to fund our staff's camp ideas, including but not limited to: Arduino Camp, LEGO Mindstorms Camp, Minecraft Modding Camp.

We will be hosting week long camps once again during the upcoming holidays, and for that reason we are requesting \$25 to help fund these ventures.

Media Release

For the purposes of publicity, we will be taking pictures of your children at camp. For this reason we request your (parent/guardian) signature below

I do hereby give and grant San Diego Code and those acting under its permission or upon its authority full and exclusive permission to copyright, use, and publish any and all photography of my child and to make changes or alterations in such photographs for Television, Public Service Announcements, and Billboards in such a way as San Diego Code deems proper. I do further certify that I am of full age and possessed of full legal capacity to execute this authorization and release.
